

28th WORLD CONGRESS OF

BIOMEDICAL LABORATORY SCIENCE

24-28 AUGUST 2008.

THE ASHOK HOTEL, NEW DELHI, INDIA

Theme: Biomedical Laboratory Science – Present and Future

Dear colleagues,

Welcome to the 28th World Congress of Biomedical Laboratory Science 2008 from 24-28 August, 2008, New Delhi, India (www.ifbls2008aiimt.org). This Congress of IFBLS in New Delhi will be an opportunity for us to unite the Biomedical Laboratory Scientists in strong fraternity to develop the profession uniformly throughout the World irrespective of race, colour, religion and economical status. We shall join hands together and march forward for a better future.

The scientific programme of the Congress has been designed to capitalise on the unique opportunities afforded by an international gathering of established Biomedical Laboratory Scientists as well as students from around the world. Indian philosophy inspires humans to find out the real cause of pathos and look for ways how to overcome it. Biomedical Laboratory Scientists identify the disease and guide for its cure. Let us take this opportunity to meet our friends around the world to foster the relationships, which will make our common endeavors successful and rewarding.

Management of IFBLS and the Congress Organizing Committee is committed to ensure your stay is comfortable during the World Congress. This Congress provides you a unique opportunity to visit New Delhi, one of the most historic capitals in the world and world heritage sites, Taj Mahal, Qutub Minar and Humayun's Tomb.

Welcome to Delhi.

Manindra Chaudhuri

Chairman,

Congress Committee, India
